

Study 3: Confirmatory validation of the GSAT-SE and GSAT-SR – online survey

My name is Sarah Hamilton, I am a HDR Candidate with the Griffith University School of Human Services and Social Work and currently undertaking a study to validate a competency tool for assessing clinical supervisors titled; **'A psychometric validation of the Generic Supervision Assessment Tool (GSAT) for assessing competency among clinical supervisors'**. I am seeking supervisors and supervisees interested in participating in the confirmatory validation of this tool.

About the research

Clinical supervision is important for professional development, support, and quality clinical outcomes. This research aims to evaluate a new rating scale, the Generic Supervision Assessment Tool (GSAT), comprising of 32 questions, which could be used for assessing the generic skills and competencies of clinical supervisors.

The research team

The research team consists of Associate Professor Lynne Briggs Head School Griffith University School of Human Services and Social Work, Professor Analise O'Donovan Dean Academic (Health) Griffith University, Dr Maddy Slattery Senior Lecturer Griffith University School of Human Services and Sarah Hamilton HDR Candidate Griffith University School of Human Services and Social Work.

You are invited to participate in the confirmatory validation of the GSAT

If you are a supervisor or supervisee active in supervision we would like to invite you to participate in an online survey for the purpose of validating the GSAT as a tool for assessing supervisor competency. You will be asked to complete the *Generic Clinical Supervision Assessment Tool* and a short survey about the use of this tool. You will also be asked to provide some demographic information and complete other brief supervision rating scales which focus on your perceptions of your last supervision session. The questionnaires should take you approximately 15-20 minutes to complete. Participants can enter in the draw to win the **\$200** Visa gift card.

Information sheet and consent to participate

Information and consent for participation in the research is outlined at the beginning of the online Survey Monkey. By continuing to proceed with the online survey you will be expressing your consent to participate. Ethical approval has been obtained for this research from Griffith University (**GU 2015/835**) and Metro South Health Research Ethics Committee (**HREC/16/QPAH/458**).
